- 3 Consolidated results as of March 31, 2026,
- 4 From FY2022, the Company changed the items for EBITDA+S. New definition of EBITDA+S has been applied retroactively to FY2021.
EBITDA+S : Operating income + depreciation and amortization (excluding depreciation of right-of-use assets) + share-based payment expenses ± other operating income/expenses.
EBITDA+S changed its name from adjusted EBITDA in FY2025.

- 1 The Company is aware there may be legal restrictions in this area and so will endeavor that the Company's work meets those requirements.
- 2 Sum of the estimated size of addressable markets for the job advertising & talent sourcing tools market, the direct hire market and the retained search market in terms of annual revenue, the estimated size of the addressable market for the internal recruitment automation market in terms of the amount of current expenses of employers for internal talent acquisition resources that could be reasonably automated and monetized plus the estimated size of the addressable market for the ATS market and the Background Checks market, and the addressable markets for the temporary staffing market in terms of annual gross profit plus the estimated size of the addressable markets for the Talent Platforms, Staffing Platforms, VMS/FMS, MSP, and RPO markets, in each case based on the Company's estimates and third party market data as described in the notes below.
- 3 Source for 2024: SIA, The Evolution of Recruiting: 2025 Update to Estimating the Addressable Market for Recruitment Automation (custom research commissioned by Indeed): January 2025 Update.
- 4 Source for 2024: SIA, Global Staffing Market Estimates & Forecasts November 2024. Placement & Search market is derived by applying 15.2%, which was Placement & Search's share of 2023 Global Staffing Revenue, to the sum product (a) of -9% growth rate from SIA, America's Staffing Market Forecast November 2024 applied to 229 billion US dollars, which was America's Total Staffing market in 2023, (b) of -2% growth rate applied to 263 billion US dollars, which was EMEA Total Staffing market in 2023, and (c) of 7% growth rate applied to 159 billion US dollars, which was APAC Total Staffing market in 2023, all from SIA, Global Staffing Market Estimates & Forecasts November 2024. Direct Hire market is defined as a segment of Placement & Search market, which in turn is a segment of Global Staffing Industry Market. Direct Hire Market segment was derived by applying SIA's Global Staffing Industry Market figure to country-by-country ratios of the relative proportion attributable to this segment within the total market based on proprietary third party market data. Retained Search Market is defined as the portion of Placement & Search Market not attributable to the Direct Hire Market and derived as the difference between these two segments.
- 5 Source for 2024: derived by applying a gross profit margin of 18.72%, which was calculated based on the weighted average of the top 3 publicly traded global staffing companies in terms of revenue in 2024, to 536 billion US dollars, which was the estimated revenue of the temporary staffing market in 2024. 536 billion US dollars is a sum product (a) of -9% growth rate of the Total Staffing market from SIA, America's Staffing Market Forecast November 2024 applied to 206 billion US dollars, which was America's temporary staffing market in 2023, (b) of -2% growth rate of the Total Staffing market applied to 225 billion US dollars, which was EMEA temporary staffing market in 2023, and (c) of 7% growth rate of the Total Staffing market applied to 120 billion US dollars, which was APAC temporary staffing market in 2023, all from SIA, Global Staffing Market Estimates & Forecasts November 2024.
- 6 Source for 2024: SIA, The Evolution of Recruiting: 2025 Update to Estimating the Addressable Market for Recruitment Automation (custom research commissioned by Indeed): January 2025 Update. SIA's estimates are based on the assumption that 46% of historical spending on internal talent acquisition resources could be reasonably captured by current technology and that technology would result in 37% cost savings from historical spending. In the report, SIA notes given the challenges in making global estimates with incomplete information, and in estimating potential automation and savings, SIA advises readers to think of the estimated market size as a midpoint in a range with a 20% spread. This market estimate includes the addition of the ATS market and the Background Checks market.
- 7 As described above, the estimates of the job advertising & talent sourcing tools market, the direct hire market, the retained search market, the internal recruitment automation market and the temporary staffing market are based on internal estimates and independent market research in addition to third party market data. Accordingly, the estimates described above may differ materially from the actual size of such markets.

Definitions of HR Matching Markets

Job Advertising and Talent Sourcing

a collection of online and offline tools and services that help employers advertise jobs, source candidates, and build and promote their online employer brand

Direct Hire

where agencies are paid fees for placing permanent workers at employers (alt: *Permanent Placement*)

Retained Search

where agencies are paid an upfront fee to exclusively search for employees to fill specific roles at employers, commonly executive roles

Temporary Staffing

where agencies are paid to find and employ, or facilitate employment of, workers for a temporary period for business clients

Internal Recruitment Automation

estimate of how much of spending on internal talent acquisition resources and tasks that can reasonably be automated and monetized by third parties

- 1 The years indicated are Recruit Holdings' fiscal years (FY), which begin on April 1 each year and end on March 31 of the following year. All targeted figures displayed here are approximate.
- 2 Carbon neutrality includes reducing greenhouse gas (GHG) emissions as well as offsetting the remaining emissions. GHG emissions throughout business activities are the sum of direct emissions from the use of fuels in owned or controlled sources (Scope 1) and indirect emissions from the use of purchased electricity, heat, or steam in owned or controlled sources (Scope 2). GHG emissions from the value chain are indirect emissions other than Scope 1 and 2 (Scope 3). The entire value chain represents the total of Scopes 1, 2 and 3.
- 3 The period from the time a user starts an active job search on the Indeed job platform to the time the users confirm receipt of a job offer.
- 4 The initiative as of today includes providing assistance through the Company's online job platform, and through partnerships with NPOs and other organizations with whom the Company collaborates. The Company may also aim to reduce other various barriers, including newly emerging issues in the labor market by FY2030.
- 5 All employee levels refer to the following three groups including all employees, managerial positions, and senior executives. Senior executive positions are defined as Senior Vice Presidents and Corporate Officers of Recruit Holdings and Matching & Solutions Strategic Business Unit (SBU), and CEOs of the Company's major subsidiaries and heads of key functions in the HR Technology and Staffing SBUs. Figures for managerial positions and employees are calculated from Recruit Holdings, SBU Headquarters, and primary operating companies of each SBU. Managerial positions mean all of those that have subordinate employees.
- 6 The Board of Directors members are defined as Directors of the Board and Audit & Supervisory Board members.

- 1 As of April 1, 2025, HR Solutions of Matching & Solutions was transferred to HR Technology, and Matching & Solutions was renamed Marketing Matching Technologies from FY2025. The pro forma results were calculated assuming that the above transfer had been effective on April 1, 2024, and the consolidated guidance and quarterly actual results for each segment for FY2025 are shown in comparison with the pro forma results for FY2024. The calculation of pro forma results reflects adjustments to inter-segment internal revenue and corporate overhead costs in Matching & Solutions. As a result, there are slight differences between FY2024 actual results and the pro forma results other than HR Technology Japan and Marketing Matching Technologies.

The years indicated are Recruit Holdings' fiscal years (FY), which begin on April 1 each year and end on March 31 of the following year. All targeted figures displayed here are approximate.

- 2 The foreign exchange rate assumptions for the FY2026 guidance and outlook as of May 15, 2026 are 154 yen per US dollar, 182 yen per Euro and 110 yen per Australian dollar.
- 3 The sum of the three segments, including the pie charts, does not correspond with consolidated revenue and EBITDA+S due to adjustments, such as intra-group transactions.
